## Profile

Versatile Product Designer with 8+ years of expertise in problem-solving through design and a dedication to enhancing user-product interactions. Proficient in UI/UX using design software such as Figma, Adobe Creative Suite, etc., well-versed in FinTech, Crypto, NFT, and AI. Contributed to 50+ projects, several of which achieved a user base exceeding 65,000, while some with \$2 billion and more assets under management.

## Work experience

11/2019 – present  
London, UK

### Sr. Product Designer VALK

- Led the end-to-end design process for a white-label digital transaction platform, collaborating closely with developers to transform an MVP into a fully functional product.
- Successfully connected over 450+ financial institutions in the project with \$2B+ in assets under management, resulting in the platform receiving 5 prestigious industry awards, such as Swiss Fintech Awards, Sell-Side Tech, etc.
- Pioneered the design and development of a groundbreaking DeFi Analytics platform, starting from scratch and integrating innovative market analytics features.
- Attracted an impressive influx of 50,000+ unique visitors and monitored portfolios totaling \$5,000M+ shortly after its launch. Also featured in CNN, Forbes, and Yahoo.Finance.

03/2018 – 11/2019  
Moscow, Russia

### Lead UX/UI Designer Spacecode

- Cooperated directly with Russia's Top-10 Brands, including globally recognized companies like Kaspersky and OTPBank.
- Successfully completed 50+ Web, iOS and Android apps in various industries, ranging from banking loyalty programs with a user base of over 65,000+ to facilitating partner programs reaching MSP Partners of 3,000+ and supporting events with over 30,000 participants.
- Led a team of 5+ members, overseeing the design vision and conducting productive meetings with stakeholders.
- Provided design systems and mentorship for a team of 5+ junior designers.

11/2015 – 03/2018  
Irkutsk, Russia

### Web Designer Freelance & Other

- Successfully transitioned from a part-time hobby into a full-fledged profession within only 6 months, specializing in graphic and web design with attention to detail.
- Worked effectively in collaboration with multiple companies, providing design expertise and contributing to the overall growth and success of their online presence.

## Education

09/2018 – 09/2019  
Moscow, Russia

### Design | Graduate Moscow Digital Academy

- Educated in project presentations, customer relations, UX/UI rules, and color theory.
- Acquired skills in communication of project ideas, client relationships and customer needs, mastering user experience and interface design principles, and creating visually appealing designs.

## Education

09/2013 – 09/2017  
Moscow, Russia

### Cybersecurity | Bachelor Moscow State Linguistic University

- Accomplished a Bachelor's degree in Computer and Information System Security and Information Assurance.
- Successfully completed supplementary English courses and UX/UI Design profile courses.

## Crypto & AI experience

- Committed to continuous learning of React, JS, CSS, HTML Solidity, and Web3 overall as a hobby, while simultaneously pursuing graphic design and creativity for NFTs.
- Researching the flexibility of AI and successfully leveraging its capabilities to optimize and automate various tasks.
- Spearheaded and effectively managed a personal NFT Project, resulting in the acquisition of over 1,000+ holders.
- Made significant contributions as a full-stack developer (JS, Solidity) to the development of multiple projects, notably a crypto venture boasting an impressive 15,000+ holder base and achieving a market capitalization of over \$10M+ ATH.
